

## **Feasibility Studies - Preparation, Analysis and Evaluation**

**Course Venue:** France - Paris

**Course Date:** From 3 Oct 2021 To 7 Oct 2021

**Course Place:** Champs Elysees

**Course Fees:** 6100 GBP

## **Intorduction**

This course provides professionals a firm basis to determine whether the project has sufficient merit to continue into more detailed phase. This is achieved by means of a feasibility study. A well-developed feasibility study is an essential foundation to allow project analysis and design activities to commence in a focused manner. It either refines a business case by examining the range of possible options and potential issues or forms a basis for its development.

Feasibility studies address issues that could influence the success of a potential project and assess the advantages and disadvantages of each option so they can be ranked. The end product of the study is a clear, concise report which presents the proposed project's objectives, with conclusions and recommendations for the next phase.

### **This course will feature:**

- What is a feasibility study
- When is a feasibility study used
- How to develop a feasibility study
- How to critically analyse a feasibility study
- Application of project management skills and techniques

## **Objectives**

- Employ individual leadership performance by identifying methods of completing feasibility studies
- Discover effective project planning for feasibility studies for individuals and teams
- Examine project management techniques to plan and organize feasibility studies
- Use stakeholder management to involve stakeholders in feasibility studies
- Apply useful planning, organization and people management skills
