

## **Quality Assurance and Quality Control - Using ISO9001 as a framework**

**Course Venue:** France - Paris

**Course Date:** From 13 Dec 2020 To 17 Dec 2020

**Course Place:** Champs Elysees

**Course Fees:** 6100 GBP

## **Introduction**

In the global marketplace of today, organizations are challenged to deliver quality products and services that meet customer expectations. To achieve this, an organization must define and manage processes that assure quality outputs at every step of product realization. A quality management system formalizes specific techniques for process monitoring, control, measurement and improvement. Internal and third-party auditing provide assurance that quality management systems are maintained and improved. This programme emphasizes:

- The process approach to management
- The management system approach to quality assurance
- Effective design and monitoring of controls
- Techniques for process improvement
- Establishing and maintaining an effective internal audit programme
